

Worksheet 1.2

Student Name: Ayush Yadav

Branch: MCA (AI & ML)

Semester: II

Subject Name: Advance Internet Programming

UID: 25IMC13004

Section/Group: MAM-1 (A)

Date of Performance: 19/01/26

Subject Code: 25CAP-656

1. Aim/Overview of the practical:

Create a servlet that describes how to use the HttpSession object to find out the creation time and the last-accessed time for a session.

2. Coding:

```
import java.io.IOException;
import java.io.PrintWriter;
import jakarta.servlet.ServletException;
import jakarta.servlet.annotation.WebServlet;
import jakarta.servlet.http.HttpServlet;
import jakarta.servlet.http.HttpServletRequest;
import jakarta.servlet.http.HttpServletResponse;
import jakarta.servlet.http.HttpSession;

@WebServlet(urlPatterns = {"/ServSessTime"})
public class ServSessTime extends HttpServlet {
    protected void processRequest(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {
        response.setContentType("text/html");
        PrintWriter out = response.getWriter();
        HttpSession session = request.getSession(true) ;
        long create_time = session.getCreationTime();
        long access_time = session.getLastAccessedTime();

        if (session.isNew()){
            out.println("<h2>New User</h2>");
        }
        else {
            out.println("<h2>Old User</h2>");
        }
        java.util.Date date = new java.util.Date(create_time);
```

```
java.util.Date time = new java.util.Date(access_time);
out.println("<h3>Session creation time: " + date + "</h3>");
out.println("<h3>Last Accessed time:" + time+ "</h3>");
}

@Override
protected void doGet(HttpServletRequest request, HttpServletResponse response)
    throws ServletException, IOException {
    processRequest(request, response);
}

@Override
protected void doPost(HttpServletRequest request, HttpServletResponse response)
    throws ServletException, IOException {
    processRequest(request, response);
}
}
```

OUTPUT:

New User

Session creation time: Thu Jan 29 15:27:03 IST 2026

Last Accessed time:Thu Jan 29 15:27:03 IST 2026

Old User

Session creation time: Thu Jan 29 15:27:03 IST 2026

Last Accessed time:Thu Jan 29 15:28:04 IST 2026

3. Learning outcomes:

- Explore how to create and manage HttpSession objects in servlets.
- Identify whether a session is new or existing using session.isNew().
- Retrieve session creation and last accessed times with getCreationTime() and getLastAccessedTime().
- Convert session timestamps into human-readable Date objects.
